

Evelyn Upchurch

UI/UX Designer

Summary

Experienced UI/UX Designer, currently serving as a Junior UI/UX Designer at LMI, with a background including multiple internships at MITRE and a successful long-term internship at LMI. Dedicated to leveraging strong foundations in Human Computer Interaction (HCI) and frontend design to create elegant, highly intuitive graphical user interfaces (GUIs). Focused on optimizing user experiences and complex workflows within the space security and defense sectors.

Experience

LMI **Junior UI/UX Designer**

2025 - Present

- Designer for the thin-client GUI of RAPTR (Rapid Analysis and Prototyping Toolkit for Resiliency)
- Current RAPTR projects include Space-Based Environmental Monitoring (SBEM), Space Domain Awareness (SDA), and Space Control Division (SCD)

UI/UX Intern

2023 - 2025

- Designed fully-functional light theme color palette for RAPTR applications
- Worked on designs for current builds of RAPTR applications such as Orbital Analysis, Data Analytics, and Knowledge Management

MITRE Corporation - UX Intern

2019 - 2021

- Developed an operational web-based GUI for United States Space Force (USSF) warfighters on the BountyHunter project, using HTML, CSS, JavaScript with jQuery, and Python. Final product demonstrated directly to USSF General Officers
- UX Designer on an 8-person Scrum team
- Modeled orbital mechanics and ground communications for a notional satellite system and associated ground station in Systems Tool Kit (STK) and utilized cybersecurity techniques to reveal and exploit vulnerabilities in uplink/downlink communications
- Presented finding with other interns to project leaders and top staff and provided application to SDA projects
